

De novo motifs add testable differential-footprint signal

A. Database supplement highlights additional motif families

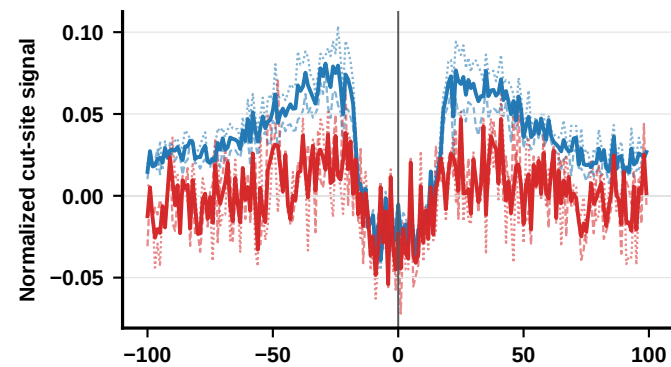

B. Representative discovered motifs

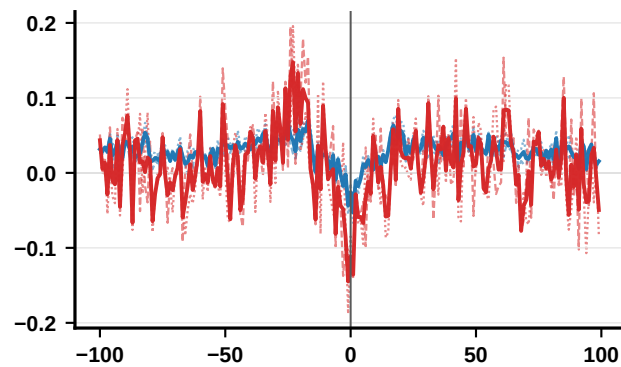

candidate set	consensus	sites	Tomtom match
B-cell enriched	AGGAAGTAAA	167	Irf1-like; q=7.6e-03
B-cell enriched	GATGAGTCA	153	BATF-like; q=2.8e-05
T-cell enriched	CATTCTGGGAA	257	ZNF143-like; q=8.0e-05
T-cell enriched	AGGAAGTGACTGA	28	IKZF2-like; q=1.1e-02

Tomtom labels are motif-similarity annotations, not definitive TF identity calls.

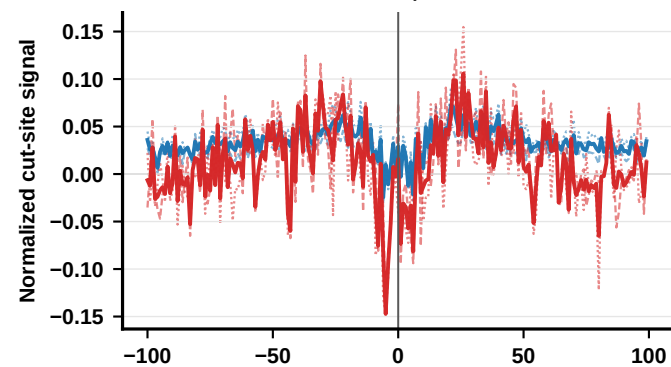

C. BATF-like (B-cell candidates)
n=9,974; deeper: Bcell

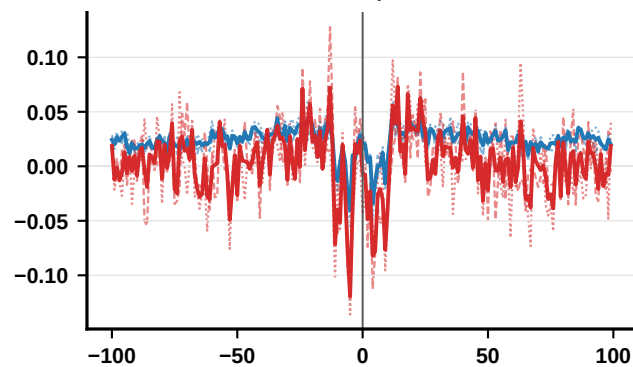

D. T-cell de novo 4 (T-cell candidates)
n=4,858; deeper: Tcell

E. IKZF2-like (T-cell candidates)
n=9,294; deeper: Tcell

F. T-cell de novo 1 (T-cell candidates)
n=9,820; deeper: Tcell
