Config

fp-tools GUI

Per-user browser wrapper around the packaged fp-tools commands.

Run directory: /tmp/fp-tools-gui-paper

Direct CLI remains primary. The GUI builds normalized configs, can save or load YAML, and can run single jobs or batch jobs without changing the core tool behavior.

Example YAML configs

Ready-to-load examples are under examples/gui_configs .

ataccorrect_batch.yml
ataccorrect_single.yml
bindetect_batch_single.yml
bindetect_comparisons_2v2.yml
bindetect_single.yml
footprintscores_batch.yml
footprintscores_single.yml
plotaggregate_batch.yml
plotaggregate_single.yml

Current config summary

```
{  
  "run_mode": "single"  
  "sample_jobs": 1  
  "comparison_jobs": 0  
}
```

```
version: 1  
run_mode: single  
run_root: null  
defaults: {}  
samples:  
- sample_id: run  
  tool: atac-correct  
  bam: ''
```
